

A Federal Petition To Re-establish the CCC Jobs Program

Dear President Biden:

We the undersigned support the current legislation in the 118th Congress for the re-establishment of the Civilian Conservation Corps (CCC). The CCC will again be part of our domestic policy as a National Service. This program will reduce unemployment rates, boost the American economy, and raise awareness of our natural surroundings. This National Service will build America's youth for the future by performing jobs that need to be done. Annually, the CCC will provide more than 300,000 jobs, for single adults from the ages of 18 thru 24 along with older War Veterans and Native Americans. Finally, the CCC will be an investment in our human and natural resource capital that will revitalize our integrity and global leadership in the conservation of our natural resources.
